THRU: Director  
 DMA Special Program Office for Exploitation Modernization  
 ATTN: DD

TO: Director  
 Central Intelligence Agency  
 ATTN: Office of Communications

Dear [REDACTED]

As you are aware from recent discussions with [REDACTED], from this office, the Defense Mapping Agency has established a new Office of Telecommunications Services. The intent of this organization is to centralize the control of all DMA communications within a single office. As this new Office gets underway, it will be useful for us to have access to documents, and assistance from an experienced communications organization such as yours. Furthermore, as we anticipate possible future requirements for interconnectivity between the two networks, it is highly desirable that we establish standards which are equal to yours from the very beginning.

We would like to call upon you to provide us with sample documents such as the red/black installation standards or examples of equipment standardization procedures to give us models upon which to build our own documentation. It would be beneficial to be able to call upon your staff to provide us with an occasional briefing on topics such as the COMSEC threat.

We are aware that there are other more formal liaison channels between our parent organizations; however, we see this association as an informal one, more along technical lines, in order to provide an exchange of technological, operational, and procedural information related to the operation of classified communications activities.

Sincerely,

[REDACTED]
